

## ET LABELING HEAD

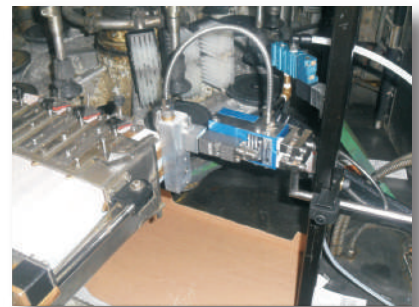

### Tail Gluing

Valco Melton's ET Labeling Head is the most up-to-date adhesive dispensing labeling component for tail gluing. ET Labeling Heads offer high speed labeling at a low price, with less maintenance and less mess than older labeling processes. The easy to use ET Labeling Head runs with Valco Melton's operator friendly MCP-4 Glue System Pattern Control. The ET Labeling Head offers extreme versatility and can be used for any magazine fed labeling application up to 175 mm.

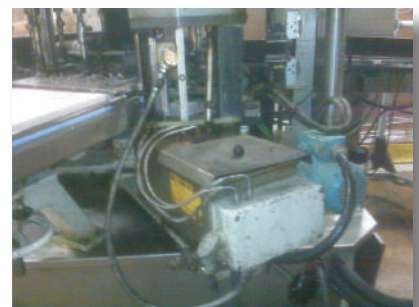

- Uses less glue therefore providing adhesive savings
- Clean application with no dripping or stringing
- Lower maintenance with fewer replacement parts and less down time which leads to greater productivity
- Runs at higher speeds than glue wheel
- Consistent gluing pattern
- Used for all magazine fed labeling systems

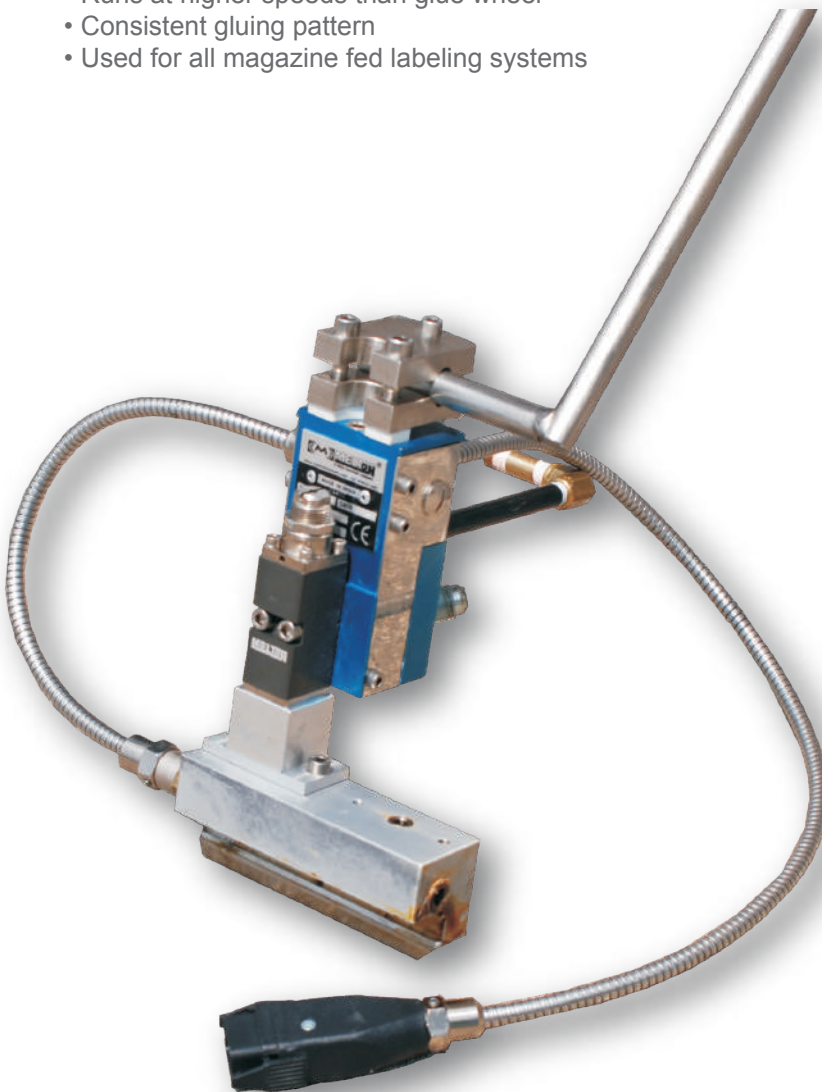

Runs at faster speeds and offers more consistency than the open roller process.

Simple installation with optional bracket package.

Old methods such as circulating rollers waste glue, and require more maintenance which leads to more down time.

The Valco Melton ET Labeling Solution with EC-4 melt tank and MCP-4 pattern control.

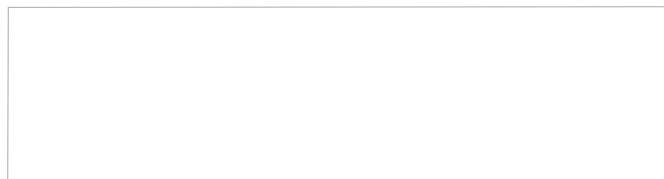

Valco Melton's range of application products offer a complete selection of hot melt components and support:

- RTD hot melt hoses
- Manual and automatic dispensing valves
- Nozzle and applicator styles
- Mounting bracket packages
- Solid-state pattern control systems
- In-line filters
- Replacement parts for competitive systems
- High-performance hot melt adhesives

## Technical Specifications

Specifications	
Width	Up to 175 mm
Coat Weights	To customer specifications
Machine Speeds	6000 Pieces per hour
Voltage	230 Volts
Wattage	225 Watts
Adhesives	PSA preferred
